Innovative transformation of off-cuts to meaningful corporate gifts, uniquely Futuristic!

To mark our new beginning in Kunshan showcasing an upgraded facility of modern touches in operations flow and systems, Futuristic has designed and created an innovative corporate gift bearing the green message. Off cuts of MDF board were used to reconstruct laptop stands, complete with our specialised spray paint finishing emboldened with the Futuristic logo.

Guests who attended our open house on 22 March 2013 were each given a piece of our green message, in appreciation of their continuous support. A functional piece, user gets to adjust the height of the laptop rack to suit their needs, with the keyboard elevated at an angle for ergonomic use. Say goodbye to twisted wrists and tired arms, knowing your daily workstation needs are taken care of at the same time so is the environment.

We hope you love our little green gift.
